3 Years 7 Months of experience

👤 PROFILE SUMMARY

- Results-driven Full-Stack Developer with nearly 4 years of experience, specializing in the MERN stack. I excel at architecting and shipping complex, end-to-end applications, from secure Node.js backends to high-performance React frontends.
- My expertise includes building real-world solutions:
- On the MERN stack, I implemented robust authentication (Google OAuth, 2FA) and integrated payment gateways (Razorpay) for my e-commerce platform.
- In my current role, I architected a complex, end-to-end internal SAAS platform (PHP/JS) that includes a multi-step approval engine, dynamic PDF generation, and digital signature tracking.

💼 WORK EXPERIENCE

Fullstack Developer

HR Geckos

10-2024 - Present

- Architected and led the full-stack development of a complex, business-critical internal SAAS platform (PHP/JS/HTML) from initial wireframe to production.
- Engineered a dynamic, multi-step policy approval workflow that sequentially routes policies to multiple approvers.
- Integrated a dynamic PDF generation module with a complete digital signature and compliance-tracking system for all users.
- Re-architected and modularized 120+ static pages into a dynamic JSON/JS template system, dramatically reducing code redundancy by 95% and improving site-wide performance.

█ PROJECTS

VKart (Full-Stack E-Commerce Platform)

3 Months

- Architected a full-stack e-commerce application from scratch using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented robust user authentication with Google OAuth (2FA) and JWT, including cross-device login notifications.
- Integrated the Razorpay Payment Gateway for secure, real-time transaction processing and webhook verification.
- Developed a secure, role-based Admin Dashboard (RBAC) with protected routes for comprehensive product, user, and order management (CRUD).
- Designed a responsive, high-performance UI with Tailwind CSS and managed complex application state using the React Context API.

🌐 SOCIAL LINKS

<https://balavardhan.dev/>

- Built and optimized reusable UI components (React.js, Next.js) and integrated RESTful APIs, measurably improving performance metrics by 15%.
- Collaborated in Agile squads to deliver, debug, and deploy enterprise-grade modules and automation tools.
- Specialized in frontend development with a focus on state management (Redux), React Hooks, and performance optimization for scalable applications.
