

# BALA VARDHAN PULA

## Fullstack Developer

+91-9542312181 | balavardhanpula@gmail.com | Hyderabad, INDIA | Experience: 4 Years 1 Month | <https://balavardhan.dev/>

Full-Stack Developer with 4 years of experience building scalable web applications using JavaScript, React.js, Next.js, Node.js, Express.js, and MongoDB. Experienced in developing full-stack MERN applications with secure authentication, payment integrations, real-time features, role-based access control, and responsive UI components. Strong focus on clean architecture, maintainable code, API integration, performance optimization, and delivering production-ready features.

## SKILLS

- React.js
- Next.js
- Express.js
- Node.js
- MERN Stack
- Payment Gateway Integration
- MongoDB
- JavaScript
- Retrieval-Augmented Generation

## WORK EXPERIENCE

### Fullstack Developer - HR Geckos

Oct 2024 - Present

- Developed handbook generation and policy lifecycle tracking features, including PDF generation, employee acknowledgement tracking, and admin-side policy management workflows.
- Designed and implemented a policy management and approval workflow system with role-based access control, enabling structured multi-stage reviews, secure approvals, and controlled access for different user roles.
- Integrated end-to-end Stripe payment workflows, including embedded checkout, invoice payments, webhook-based payment status synchronization, subscription billing handling, payment history tracking, and refund flow handling.
- Implemented secure backend validation and data integrity checks across payment, invoice, policy, and employee workflow modules, improving authorization control and reducing invalid or inconsistent data handling.
- Built responsive UI layouts and reusable frontend components across multiple application sections, improving usability, consistency, and workflow efficiency for admin and business users.

### Fullstack Developer - Tata Consultancy Services (TCS)

Dec 2021 - Jun 2024

- Developed and enhanced frontend modules using React.js and Next.js, building reusable UI components and integrating REST APIs to deliver responsive web interfaces.
- Implemented state management using Redux and React Hooks to improve data flow and maintain consistent application state across dashboards.
- Applied performance optimization techniques such as lazy loading, component memoization, and efficient API usage to improve application responsiveness.
- Collaborated with cross-functional teams to debug issues, implement feature enhancements, and deliver stable production-ready frontend features.

## PROJECTS

### VKart (Full-Stack MERN E-Commerce Platform)

Personal Project

- Built a full-stack MERN e-commerce platform with product listing, filtering, wishlist, comparison, cart management, order processing, and responsive user interfaces.
- Implemented secure authentication using JWT, Google OAuth, optional two-factor authentication, protected routes, profile management, and password reset flows.
- Developed a role-based admin dashboard for managing products, users, orders, inventory, coupons, sales, reviews, and platform settings.
- Integrated Razorpay and wallet-based checkout flows with backend payment verification for secure transaction processing.
- Built real-time order updates and user/admin notifications using Socket.io, improving live activity tracking across the platform.
- Implemented AI-powered product discovery using semantic search, vector embeddings, and Retrieval-Augmented Generation to support natural language product queries.

## EDUCATION

### 2020 B.Tech | Electronics and Communication Engineering

Lakireddy Bali Reddy College of Engineering  
Grade - 7.7/10
